

S.no Project Title CLOUD COMPUTING 1 Fuzzy Keyword Search over Encrypted Data in Cloud Computing. 2 Achieving Secure, Scalable, and Fine-grained Data Access Control in Cloud Computing. 3 Privacy-Preserving Public Auditing for Data Storage Security in Cloud Computing 4 Exploiting Dynamic Resource Allocation for Efficient Parallel Data Processing in the Clo 0 DATAMINING 5 Adaptive Join Operators for Result Rate Optimization on Streaming Inputs 6 Data Leakage Detection 7 Closing the Loop in Webpage Understanding 8 Efficient Multidimensional Suppression for K-Anonymity 9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for detecting SQL-injection vulnerabilities in Web applicat 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17	
1 Fuzzy Keyword Search over Encrypted Data in Cloud Computing. 2 Achieving Secure, Scalable, and Fine-grained Data Access Control in Cloud Computing. 3 Privacy-Preserving Public Auditing for Data Storage Security in Cloud Computing 4 Exploiting Dynamic Resource Allocation for Efficient Parallel Data Processing in the Clo 0 DATAMINING 5 Adaptive Join Operators for Result Rate Optimization on Streaming Inputs 6 Data Leakage Detection 7 Closing the Loop in Webpage Understanding 8 Efficient Multidimensional Suppression for K-Anonymity 9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks R	
2 Achieving Secure, Scalable, and Fine-grained Data Access Control in Cloud Computing, 3 Privacy-Preserving Public Auditing for Data Storage Security in Cloud Computing 4 Exploiting Dynamic Resource Allocation for Efficient Parallel Data Processing in the Clo 0 DATAMINING 5 Adaptive Join Operators for Result Rate Optimization on Streaming Inputs 6 Data Leakage Detection 7 Closing the Loop in Webpage Understanding 8 Efficient Multidimensional Suppression for K-Anonymity 9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
 Privacy-Preserving Public Auditing for Data Storage Security in Cloud Computing Exploiting Dynamic Resource Allocation for Efficient Parallel Data Processing in the Clo DATAMINING Adaptive Join Operators for Result Rate Optimization on Streaming Inputs Data Leakage Detection Closing the Loop in Webpage Understanding Efficient Multidimensional Suppression for K-Anonymity MOBILE COMPUTING MABS: Multicast Authentication Based on Batch Signature SigFree A Signature-free Buffer Overflow Attack Blocker An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature An economic approach for scalable and highly-available distributed applications A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING Al AND OPINION MINING Slow Adaptive OFDMA Systems Through Chance Constrained Programming Pricing under Constraints in Access Networks Revenue Maximization and Congestion 	
4 Exploiting Dynamic Resource Allocation for Efficient Parallel Data Processing in the Clone of the Cl	
DATAMINING 5 Adaptive Join Operators for Result Rate Optimization on Streaming Inputs 6 Data Leakage Detection 7 Closing the Loop in Webpage Understanding 8 Efficient Multidimensional Suppression for K-Anonymity 9 MABS: Multicast Authentication Based on Batch Signature 9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
 5 Adaptive Join Operators for Result Rate Optimization on Streaming Inputs 6 Data Leakage Detection 7 Closing the Loop in Webpage Understanding 8 Efficient Multidimensional Suppression for K-Anonymity MOBILE COMPUTING 9 MABS: Multicast Authentication Based on Batch Signature 9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion 	ud
 6 Data Leakage Detection 7 Closing the Loop in Webpage Understanding 8 Efficient Multidimensional Suppression for K-Anonymity MOBILE COMPUTING 9 MABS: Multicast Authentication Based on Batch Signature 9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion 	
 Closing the Loop in Webpage Understanding Efficient Multidimensional Suppression for K-Anonymity MOBILE COMPUTING MABS: Multicast Authentication Based on Batch Signature NETWORK SECURITY SigFree A Signature-free Buffer Overflow Attack Blocker An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature An economic approach for scalable and highly-available distributed applications A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING Conditional Shortest Path Routing in Delay Tolerant Networks Slow Adaptive OFDMA Systems Through Chance Constrained Programming Pricing under Constraints in Access Networks Revenue Maximization and Congestion 	
8 Efficient Multidimensional Suppression for K-Anonymity MOBILE COMPUTING 9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
MOBILE COMPUTING 9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
9 MABS: Multicast Authentication Based on Batch Signature 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
NETWORK SECURITY 10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat METWORKING 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
10 SigFree A Signature-free Buffer Overflow Attack Blocker 11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
11 An Abuse Free Fair Contract Signing Protocol Based on the RSA Signature 12 An economic approach for scalable and highly-available distributed applications 13 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
 An economic approach for scalable and highly-available distributed applications A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING AI AND OPINION MINING Conditional Shortest Path Routing in Delay Tolerant Networks Slow Adaptive OFDMA Systems Through Chance Constrained Programming Pricing under Constraints in Access Networks Revenue Maximization and Congestion 	
 A heuristic-based approach for detecting SQL-injection vulnerabilities in Web applicat NETWORKING AI AND OPINION MINING Conditional Shortest Path Routing in Delay Tolerant Networks Slow Adaptive OFDMA Systems Through Chance Constrained Programming Pricing under Constraints in Access Networks Revenue Maximization and Congestion 	
NETWORKING 14 AI AND OPINION MINING 15 Conditional Shortest Path Routing in Delay Tolerant Networks 16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
 AI AND OPINION MINING Conditional Shortest Path Routing in Delay Tolerant Networks Slow Adaptive OFDMA Systems Through Chance Constrained Programming Pricing under Constraints in Access Networks Revenue Maximization and Congestion 	ons
 Conditional Shortest Path Routing in Delay Tolerant Networks Slow Adaptive OFDMA Systems Through Chance Constrained Programming Pricing under Constraints in Access Networks Revenue Maximization and Congestion 	
16 Slow Adaptive OFDMA Systems Through Chance Constrained Programming 17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
17 Pricing under Constraints in Access Networks Revenue Maximization and Congestion	
18 Dynamic Authentication for Cross-Realm SOA-Based Business Processes.	
19 Analysis of P2P File Sharing Network's Credit	
20 ANONYMOUS QUERY PROCESSING IN ROAD NETWORKS	
22 Bridging Socially-Enhanced Virtual Communities
